Introduction

YouthLink is a centralized SaaS-based platform designed to organize youth records, support SK operations, and provide clearer monitoring for LYDO.

Current Process of the Organization

Current Problems Faced by the Organization

Youth Records

Difficult to update, retrieve, and organize when stored separately.

Programs & Activities

Schedules, budgets, responsibilities, and accomplishments are harder to track in one place.

Documents

Minutes, resolutions, and accomplishment reports may be prepared and stored in different files.

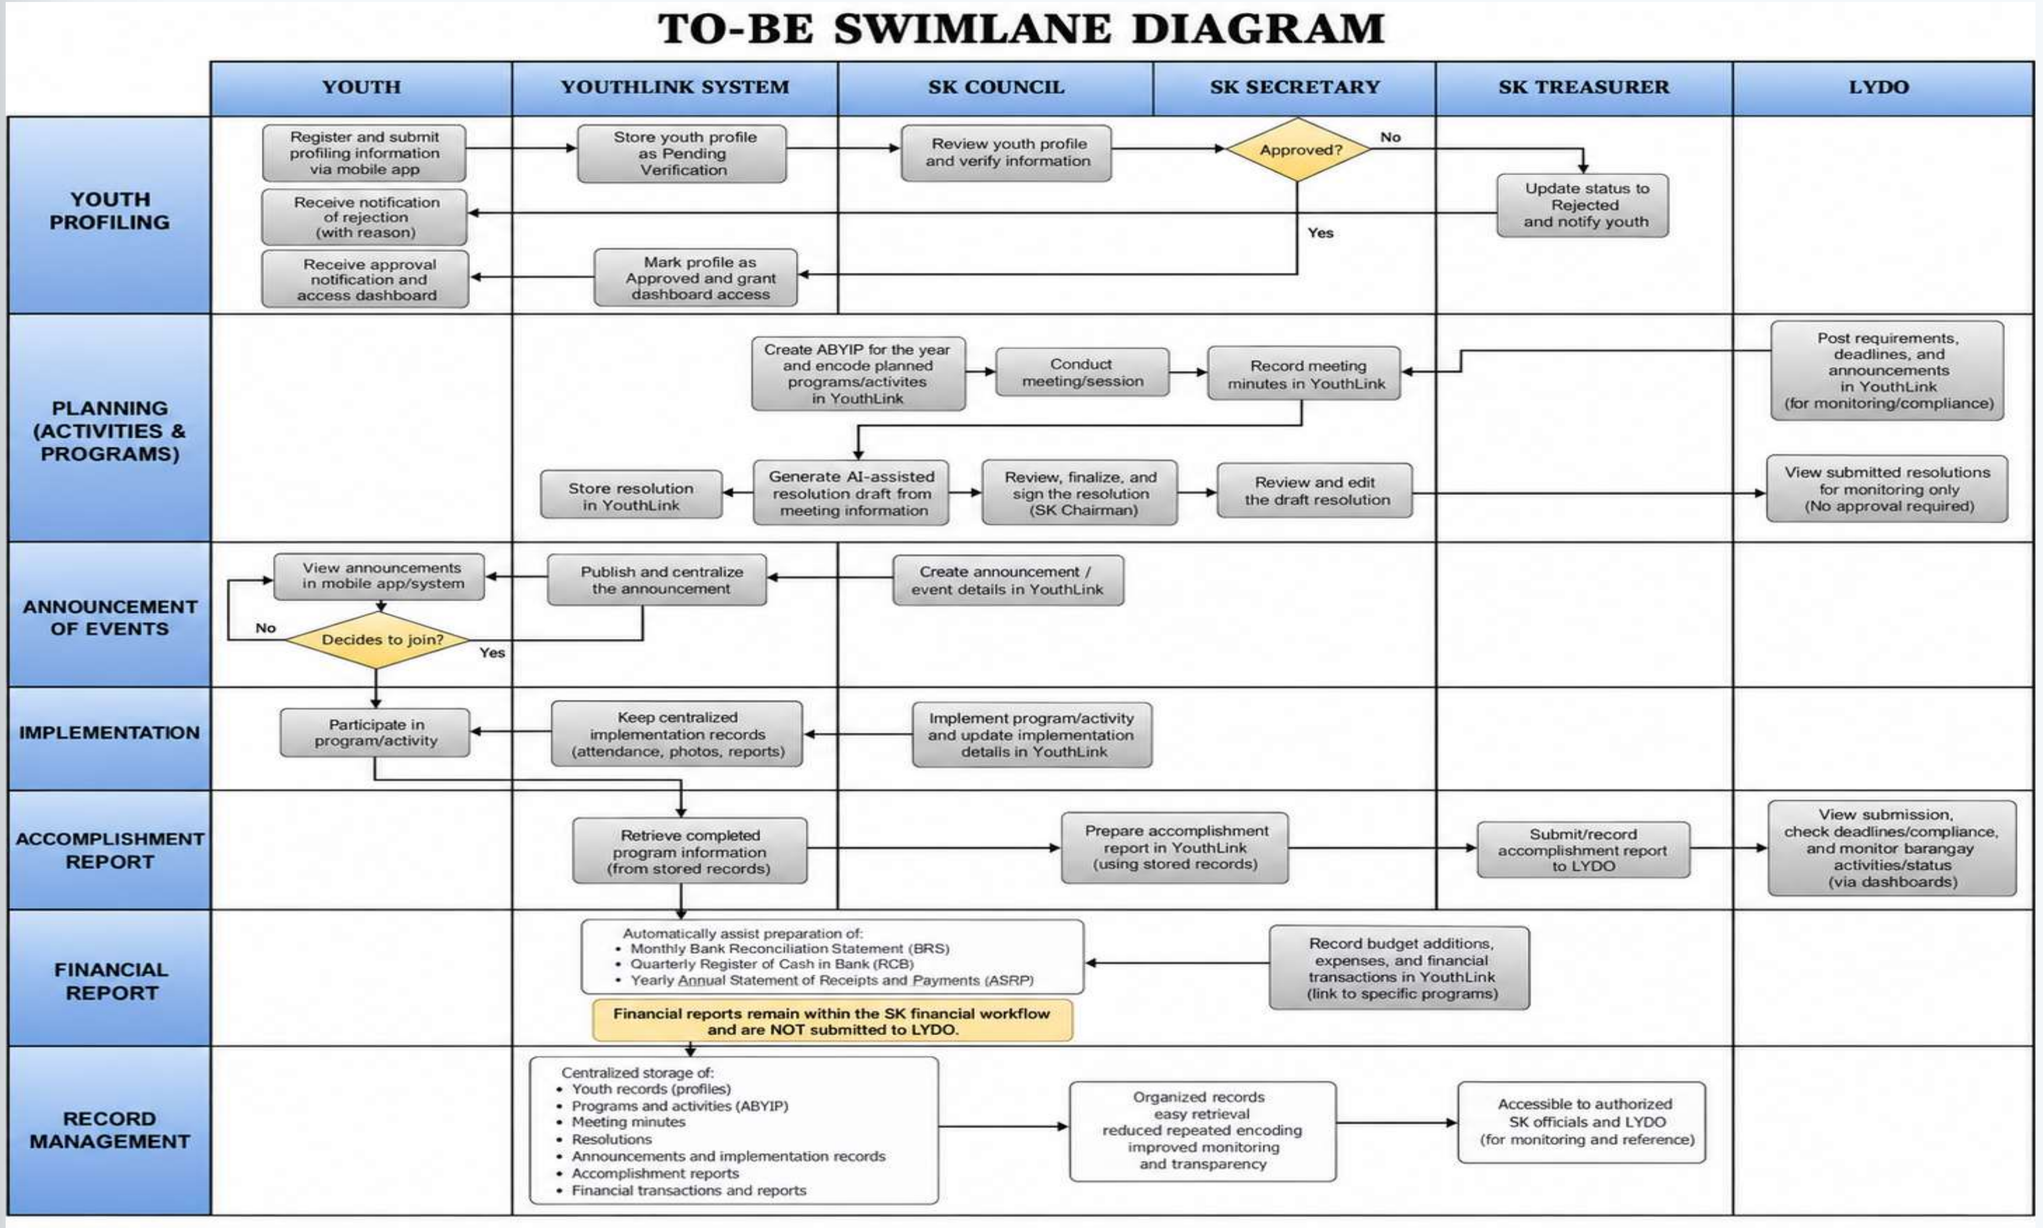

Financial Reports

BRS, RCB, and ASRP require repeated encoding and consolidation of transactions.

LYDO Monitoring

Limited centralized visibility of submissions, deadlines, requirements, and barangay status.

Proposed Solution: YouthLink

Proposed Solution: YouthLink

Youth Records

Verified youth records and organized retrieval.

Programs & Activities

Activities, schedules, budgets, status, and accomplishments

Documents

Minutes plus AI-assisted resolution drafting with human review.

Financial Reports

Record budget additions/expenses and assist BRS, RCB, and ASRP preparation.

LYDO Monitoring

Submit resolutions and accomplishment reports; track deadlines and status.

GENERAL OBJECTIVES

The primary objective of this study is to develop YouthLink: A SaaS-Based Web System for Youth Management and Services Platform that centralizes youth records, SK operations, financial management, reporting and compliance, and LYDO monitoring in one platform.

SPECIFIC OBJECTIVES

Specifically, this project aims to:

1.develop a User and Access Management Module to manage Super Admin, LYDO, SK officials, and youth accounts with access based on their assigned roles and municipality or barangay;

2.create a Youth Profiling and Records Management Module that allows youth to register and submit their profiling information through a mobile application, while allowing SK officials to verify, update, organize, and retrieve youth records;

3.develop a Program and Activity Management Module to manage the Annual Barangay Youth Investment Program (ABYIP), including programs and activities, implementation schedules, allocated budgets, responsible persons, implementation status, and accomplishments;

SPECIFIC OBJECTIVES

4. develop a Document and Resolution Management Module to record meeting minutes, manage resolutions, and provide AI-assisted drafting of resolutions based on recorded meeting information while keeping the review and finalization under authorized SK officials;
5. develop a Financial Management Module to record budget additions, expenses, and other financial transactions and use these records to assist in preparing the monthly Bank Reconciliation Statement (BRS), quarterly Register of Cash in Bank and Other Related Financial Transactions (RCB), and yearly Annual Statement of Receipts and Payments (ASRP);
6. develop a Reporting and Compliance Management Module to prepare accomplishment reports and manage SK compliance with LYDO requirements by allowing the LYDO to set report requirements and deadlines and allowing the SK to submit necessary resolutions and accomplishment reports and track their submission status;

SPECIFIC OBJECTIVES

7. develop a Monitoring, Dashboard, and Analytics Module to provide summarized information on youth records, programs and activities, reports, resolutions, and submission status, while providing the LYDO with a centralized view for monitoring participating barangays;
8. develop a SaaS Administration Module to manage municipalities, barangays, LYDO accounts, and other platform-level records needed to support multiple participating localities; and
9. evaluate the developed YouthLink system based on appropriate software quality criteria, including its functionality and usability.

Scope and Target Organization

Target Organization

LYDO and SK offices in five selected barangays of Aleosan North Cotabato:

Sta. Cruz, Dualing, San Mateo, Katalicanan, Tomado

Primary Users / Beneficiaries

- Super Admin
- LYDO personnel
- SK Chairperson / Secretary / Treasurer
- Youth

Scope and Target Organization

Core Scope

- User & Access Management Module
- Youth Profiling & Records Management Module
- Program, Activity & Event Management Module
- Document & Resolution Management Module
- Financial Management Module
- Reporting & Compliance Management Module
- Monitoring, Dashboard & Analytics Module
- SaaS Administration Module

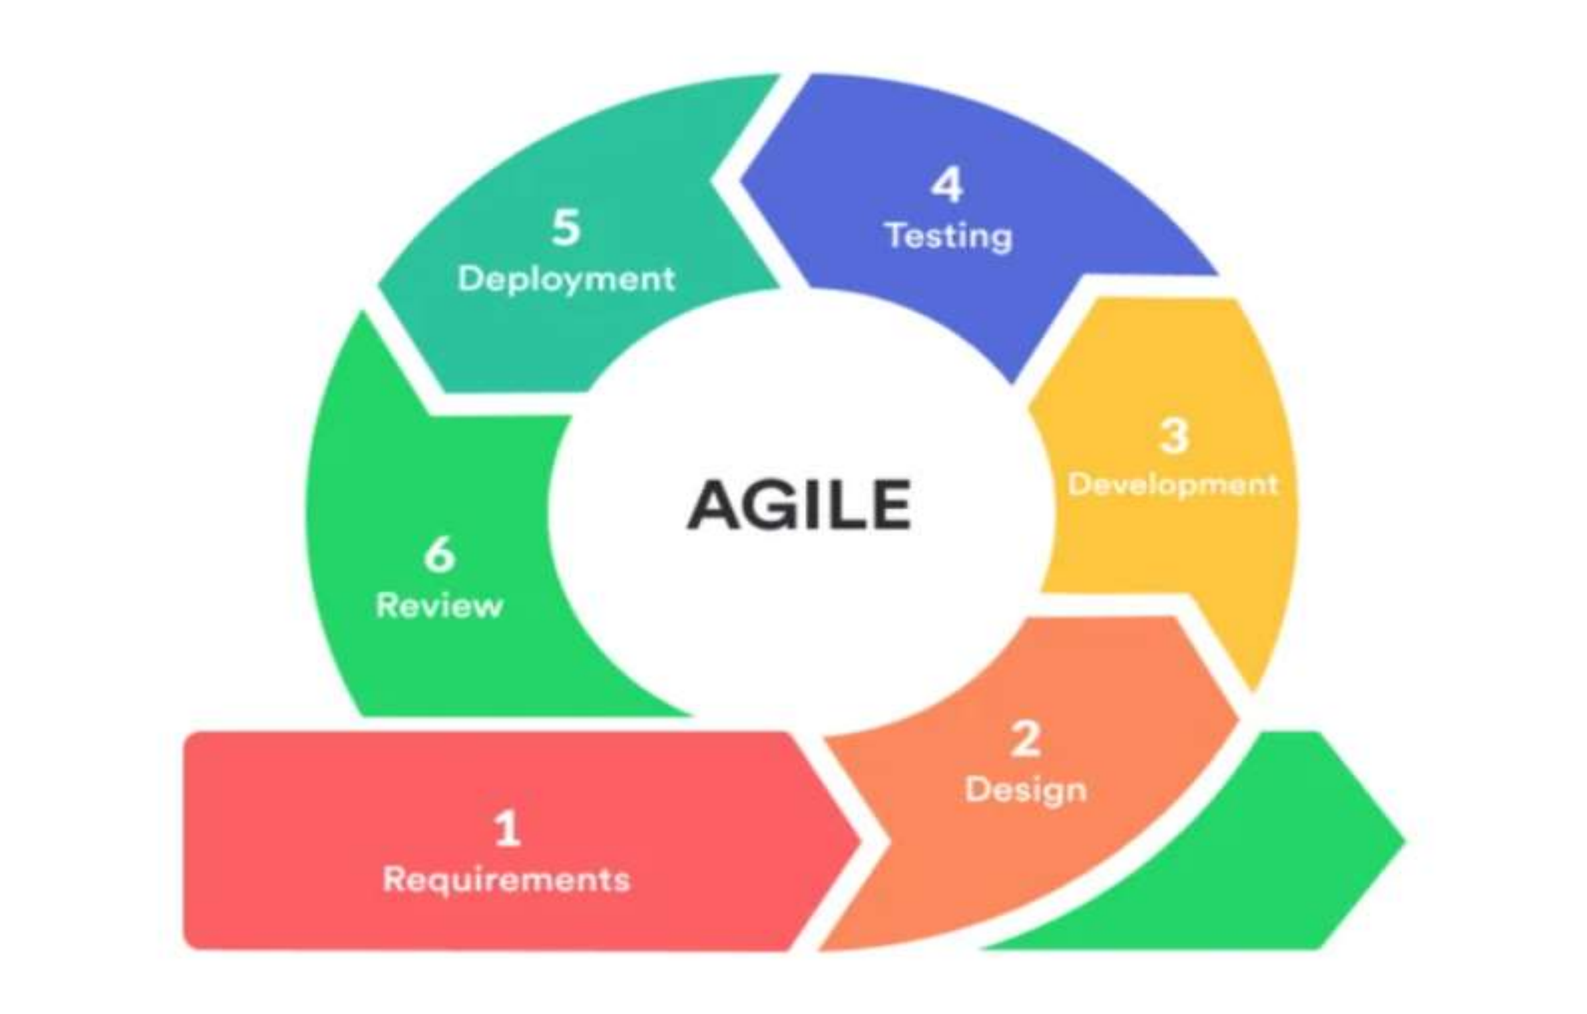

Related Studies & Research Gap

Research Gap

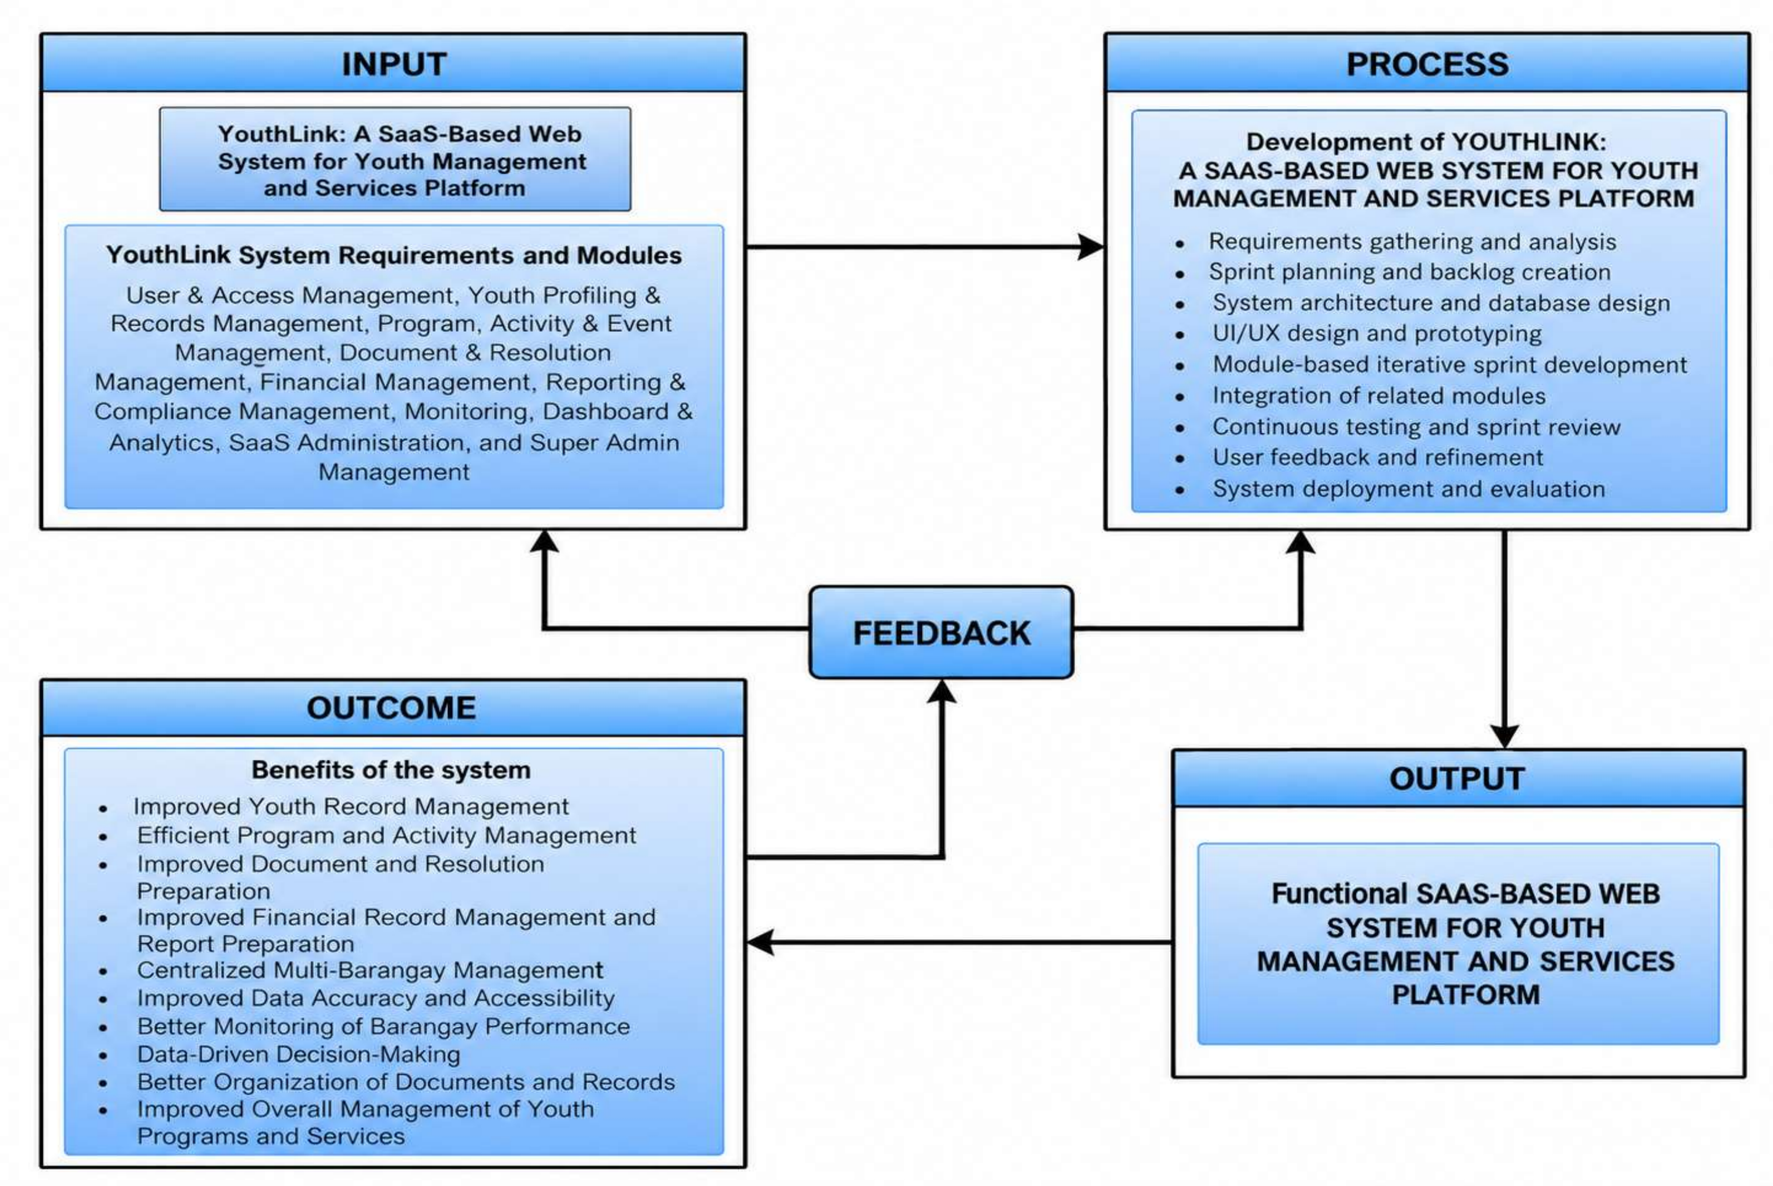

Existing studies support digital records, e-government, and data-driven management, but do not specifically integrate youth profiling, ABYIP workflows, resolution support, financial-report preparation, and LYDO monitoring in one localized SaaS platform.

Conceptual Framework

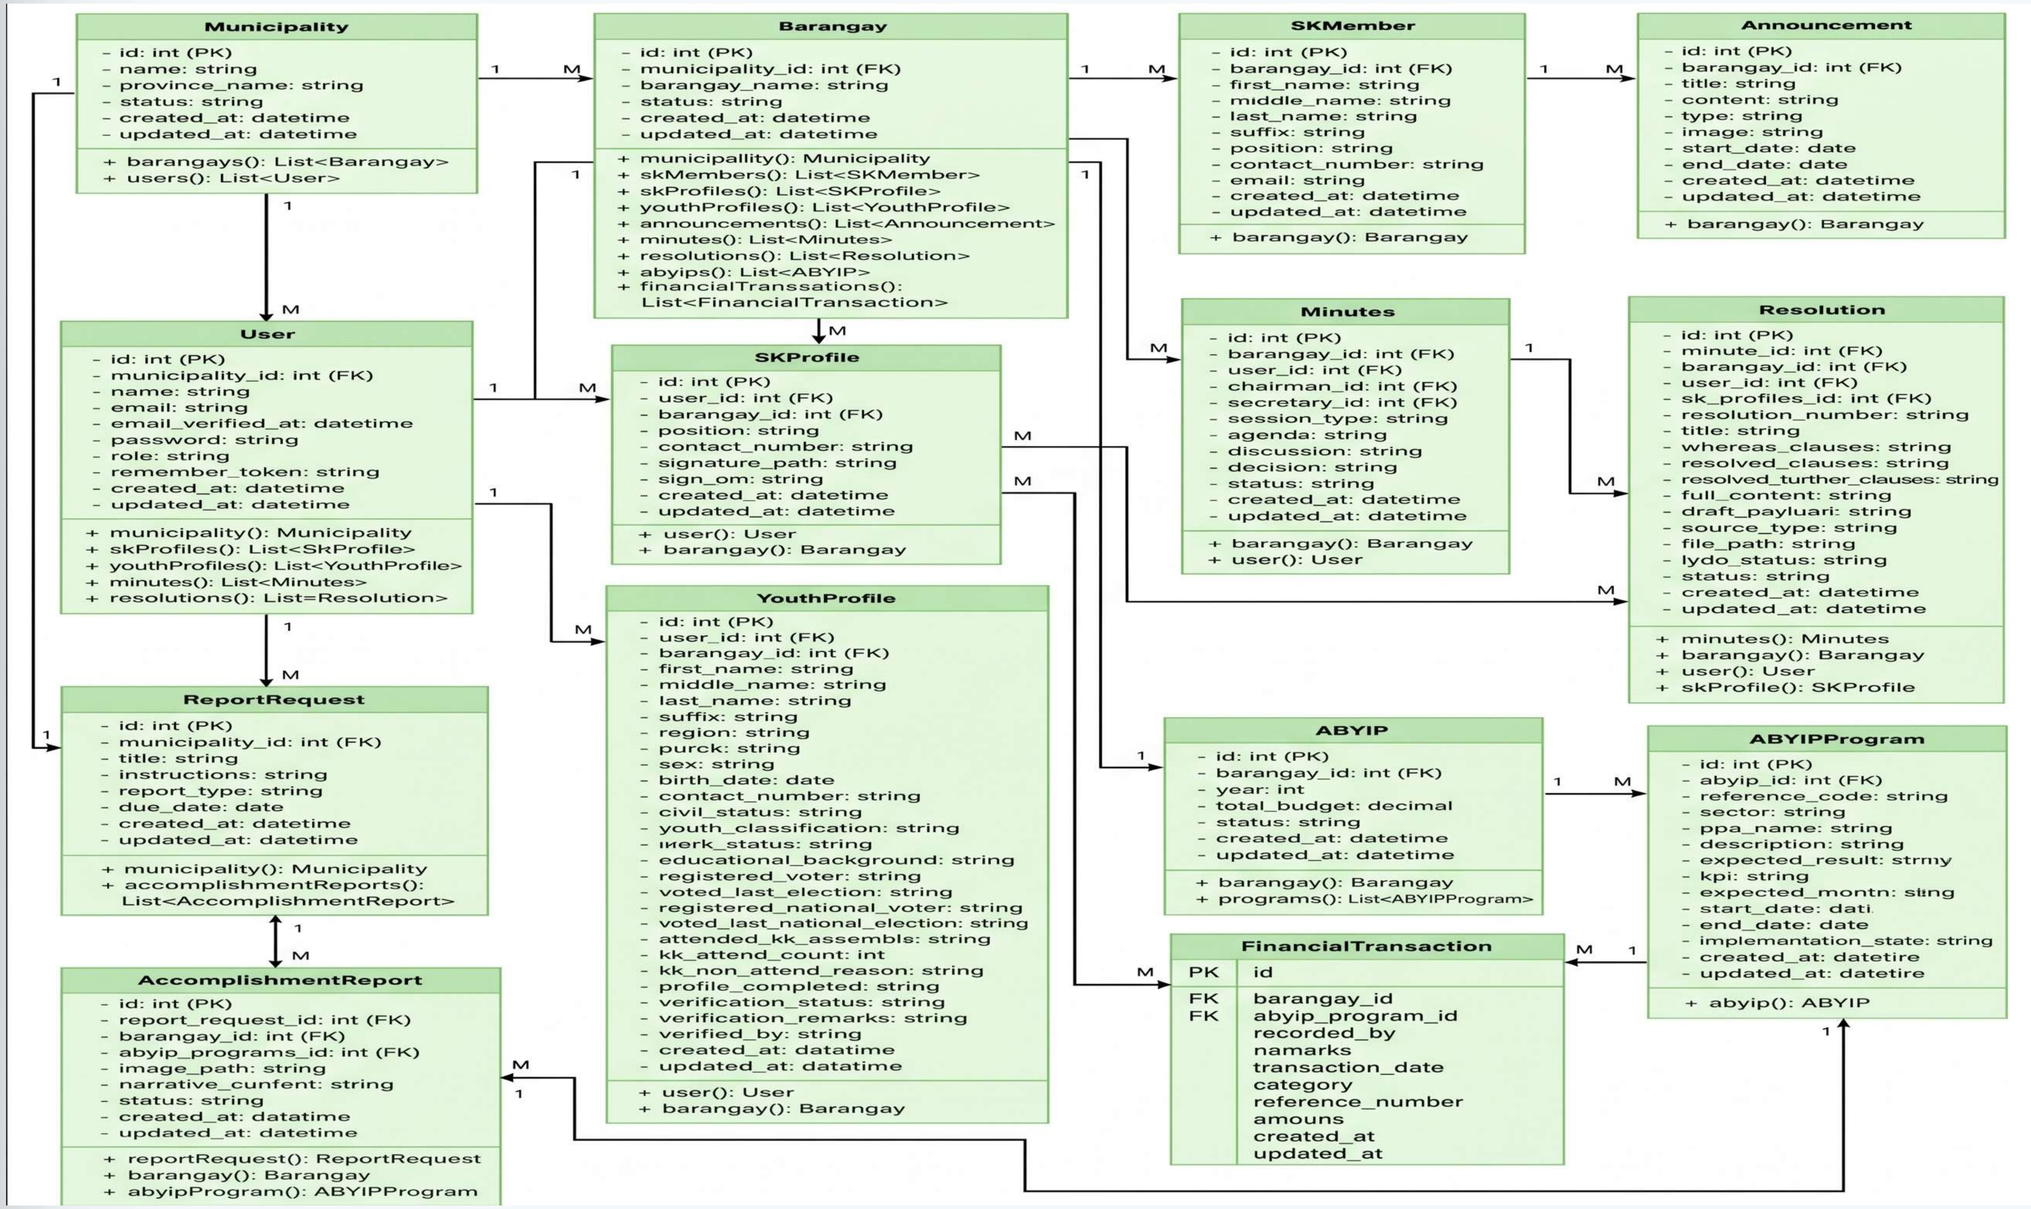

USE CASE (DIAGRAM)

Entity Relationship Diagram (ERD)

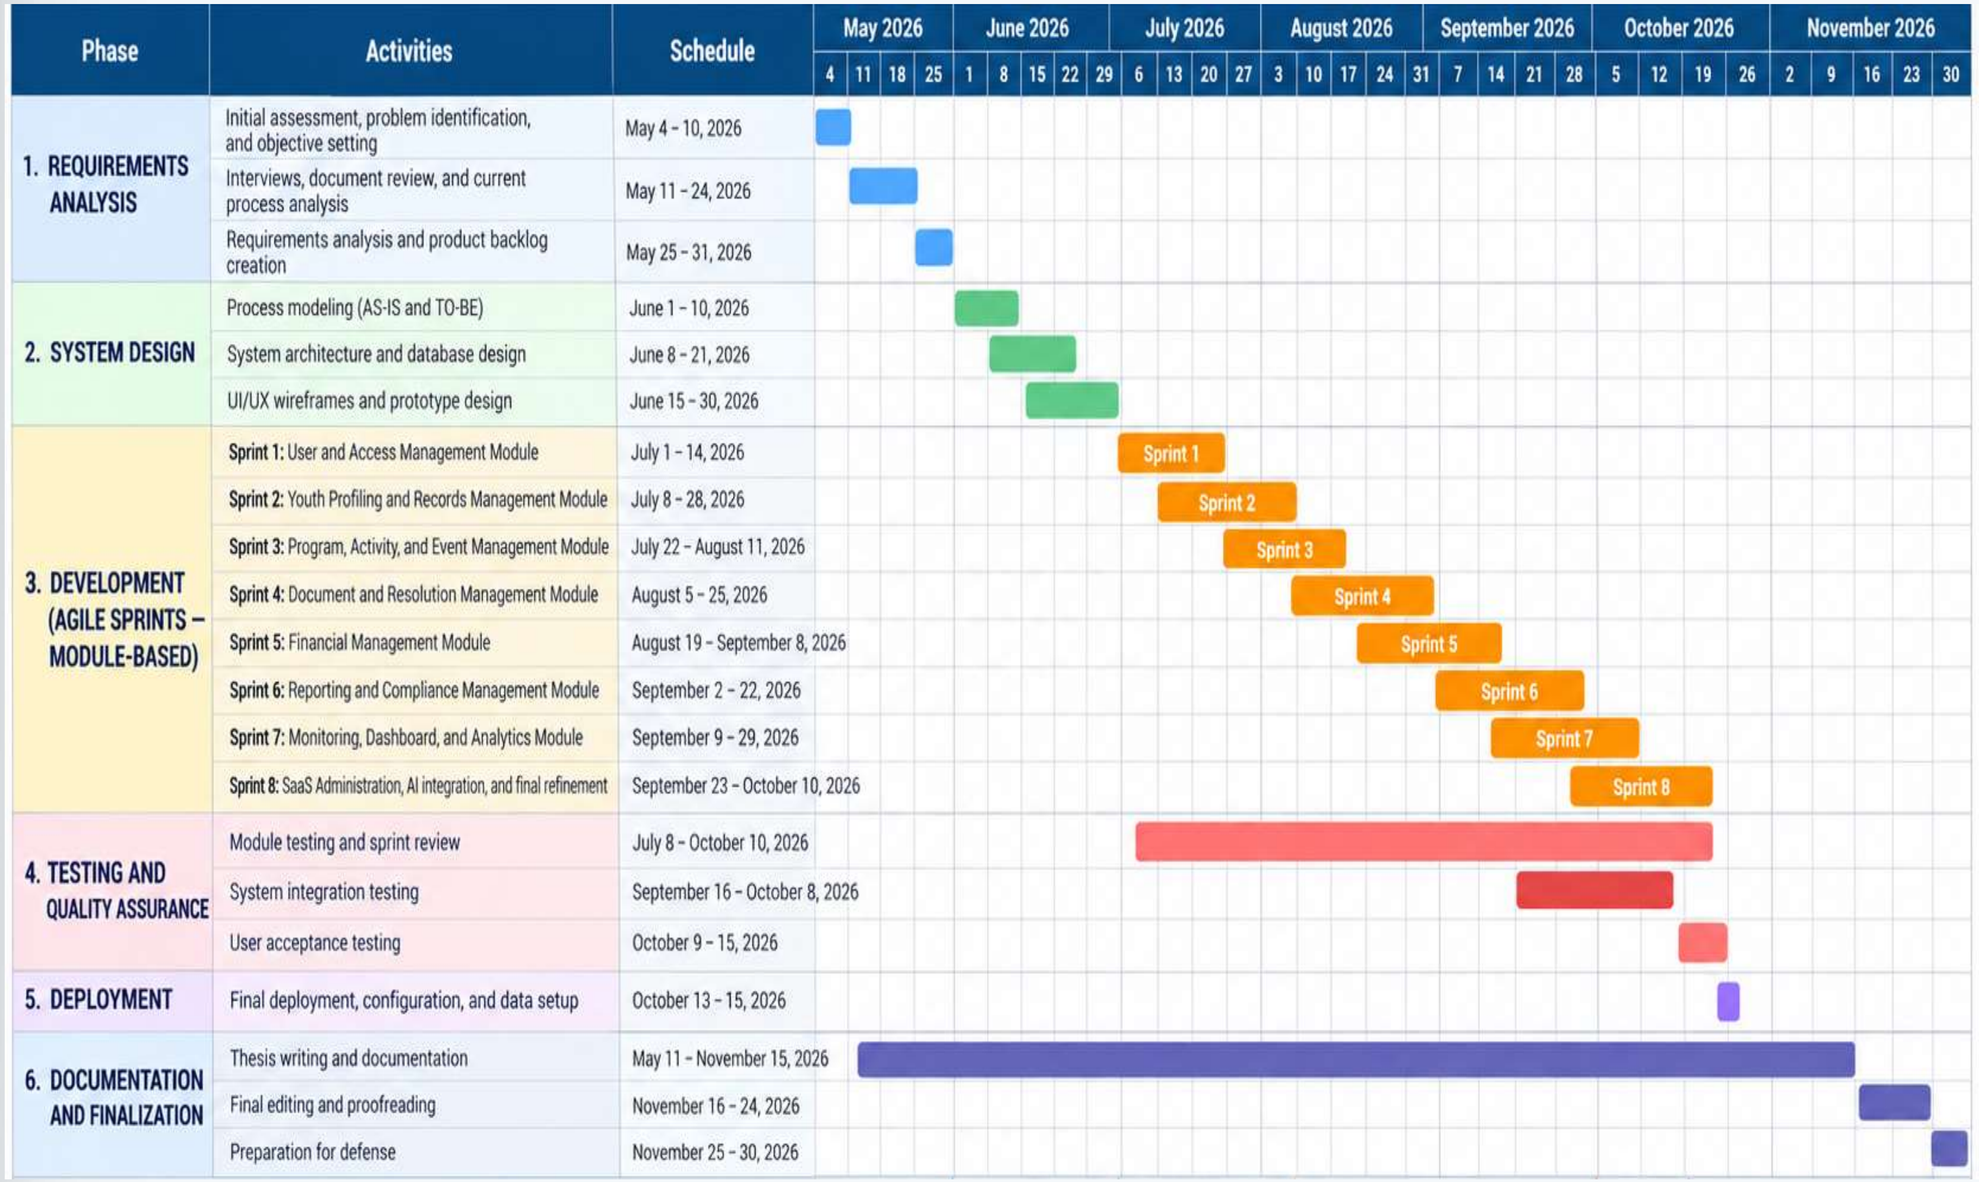

CLASS DIAGRAM (DIAGRAM)

GANTT CHART

Phase	Activities	Schedule
1. REQUIREMENTS ANALYSIS	Initial assessment, problem identification, and objective setting	May 4 – 10, 2026
	Interviews, document review, and current process analysis	May 11 – 24, 2026
	Requirements analysis and product backlog creation	May 25 – 31, 2026
2. SYSTEM DESIGN	Process modeling (AS-IS and TO-BE)	June 1 – 10, 2026
	System architecture and database design	June 8 – 21, 2026
	UI/UX wireframes and prototype design	June 15 – 30, 2026
3. DEVELOPMENT (AGILE SPRINTS – MODULE-BASED)	**Sprint 1:** User and Access Management Module	July 1 – 14, 2026
	Sprint 2: Youth Profiling and Records Management Module	July 8 – 28, 2026
	Sprint 3: Program, Activity, and Event Management Module	July 22 – August 11, 2026
	Sprint 4: Document and Resolution Management Module	August 5 – 25, 2026
	Sprint 5: Financial Management Module	August 19 – September 8, 2026
	Sprint 6: Reporting and Compliance Management Module	September 2 – 22, 2026
	Sprint 7: Monitoring, Dashboard, and Analytics Module	September 9 – 29, 2026
	Sprint 8: SaaS Administration, AI integration, and final refinement	September 23 – October 10, 2026
4. TESTING AND QUALITY ASSURANCE	Module testing and sprint review	July 8 – October 10, 2026
	System integration testing	September 16 – October 8, 2026
	User acceptance testing	October 9 – 15, 2026
5. DEPLOYMENT	Final deployment, configuration, and data setup	October 13 – 15, 2026
6. DOCUMENTATION AND FINALIZATION	Thesis writing and documentation	May 11 – November 15, 2026
	Final editing and proofreading	November 16 – 24, 2026
	Preparation for defense	November 25 – 30, 2026
